Chikitsa e-Mitra is a Rajasthan's public Welfare and Patient history management and prescription management system.

Idea behind the problem is whenever a patient visits to a hospital for any medical treatment, then doctor gives those Tests, Treatments, Reports and medical prescriptions. After some days, they forget or lost any reports or any medical prescription, due to some reason. Now they want to visit same or another doctor and they ask for the old records, which is currently unavailable. The solution is to put everything in soft copy on cloud with a secure database. This will solve the issue of lost records. We are connecting hospital and users to e-Mitra kendra. So for this problem we are making a database and the healthcare records management system. Now any patient enters his Aadhar card number to website or the e-Mitra kendra and get all the history and the prescriptions details only on single click. we can also keep track on the number of patients for each disease. For example how many heart patients, cancer patients etc.

Primary objective of this portable system is to provide a complete transparency between the medical departments and the patients.

These master data will be available and can be accessible through the **e-Mitra Kendra** with all Villages, Gram Panchayat, Block, Tahsil and City, Hence one can utilize the feature of **Chikitsa e-Mitra** any time.

Benefits of Chikitsa e-Mitra

- Providing Transparency between Hospitals/Doctors and Patients.
- An integrated platform and Patients can keep track of their medical reports/prescriptions/treatments.
- NO need of maintaining paper records for the patients.
- Quick access through **e-Mitra Kendra**.
- **Chikitsa e-Mitra** is a single source to get the unified data for the patient's treatment history.
- Reduction the cases of lost patients treatment history.
- 100% accuracy in data management.
- Paper less state.
- Hospital visits are paperless.

Enrolment Process:

Enrollment is a registration process for the patients, Since **Aadhar Number** is mandatory He/She has to give his/her **Aadhar Number/Bhamashah Number** along with phone number while registration for the first time in the hospital. If an individual does not have an **Aadhaar number/Bhamashah**, facility for Aadhaar/Bhamashah registration is available at selected e-Mitra kiosks. Photograph & biometric detail is captured for such individuals. Provision for correction of existing data is also available at the e-Mitra kiosks.
