

चिकित्सा ई-मित्र

Version 1.0

Hospital visits are now paperless.
Team- Brahmha IO

Components

- ☐ Introduction
- ☐ Idea behind the problem
- ☐ Benefits
- ☐ Enrolment Process
- ☐ Future Scope
- ☐ Conclusion

Introduction

Chikitsa e-Mitra is a Rajasthan's public welfare and patient history and prescription management system. It allows a patient or an individual to access their medical records. It is an automated system which can be totally accessible through the e-Mitra Kendra/Bhamashah Kendra from Villages, Gram Panchayat, Block, Tehsil and City, hence one can use Chikitsa e-Mitra using Bhamashah Family Id and Registered Mobile number any time

Idea behind the Problem

- ☐ Transparency between the medical departments and the patients.
- ☐ Patients hospital records are not on Cloud i.e. Prescription, Test Reports etc.
- ☐ Fear of loosing Patients medical history reports.
- ☐ Problem with keeping safe all medical reports of patients all the time.
- ☐ Locating all the reports/prescription/reports is problem.
- ☐ Remembering all the prescription and doses every time.
- ☐ Changing doctor and treatment not easy yet.

Benefits

- ☐ Hospital visits are paperless.
- ☐ Medical records are quickly accessible/downloadable through **e-Mitra Kendra**.
- ☐ Single source to get unified data for the patient's medical history and records.
- ☐ Reduction the case of lost patients treatment history.
- ☐ 100% accuracy in data management.

Enrolment Process

Enrolment is a registration process for the patients, Since **Aadhar Number** is mandatory He/she has to give his/her **Aadhar Number/Bhamashah Number** along with phone number while registration for the first time in the hospital. If an individual does not have an **Aadhaar number/Bhamashah**, facility for Aadhaar/Bhamashah registration is available at selected e-Mitra kiosks. Photograph & biometric detail is captured for such individuals. Provision for correction of existing data is also available at the e-Mitra kiosks.

Future Scope

- ☐ Mobile App Development.
- ☐ Patient's data analysis.
- ☐ Medicine Scheduler/Reminder.
- ☐ Doctors profiles.
- ☐ Emergency services.

Conclusion

We all are working to make India Digital and here we are contributing a small idea so that the real time problem of being roughly treated in medical department can be solved by implementing this in our state will help in making transparency between hospitals and patients. This system will lead a new success in Rajasthan medical department.
